

Presentation

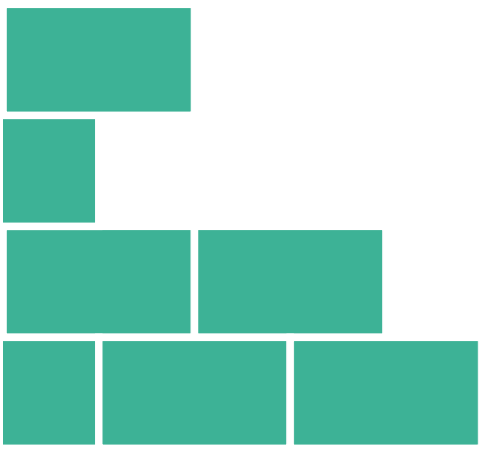

# BUILDING BRIDGES

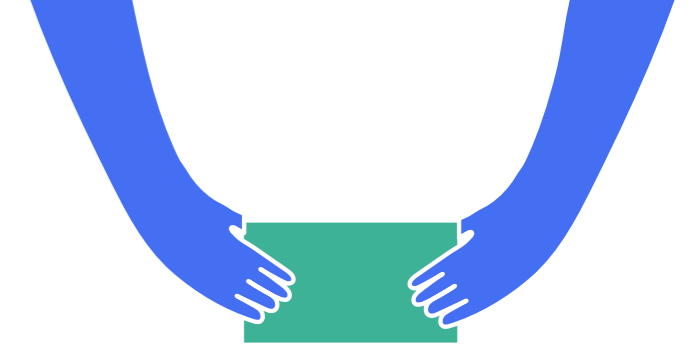

1.

Divide into **teams of four.**

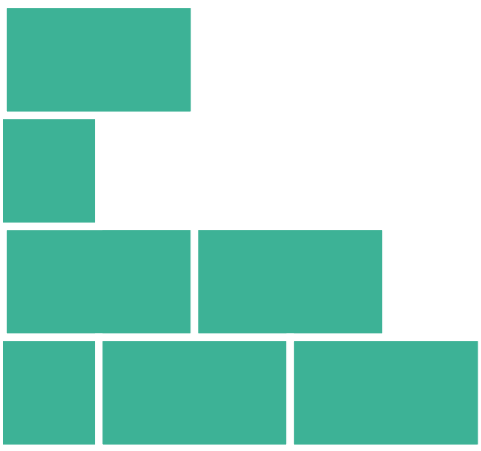

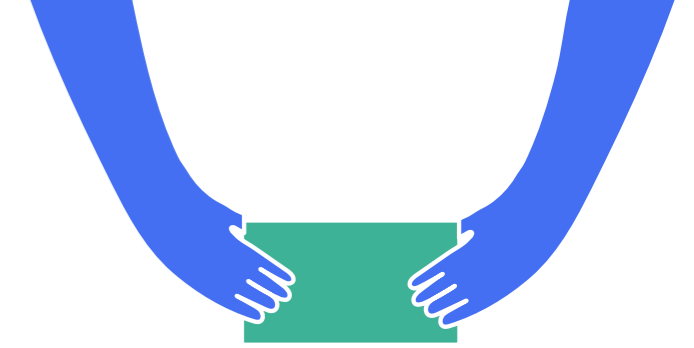

## 2.

In teams, take the seats you have prepared.

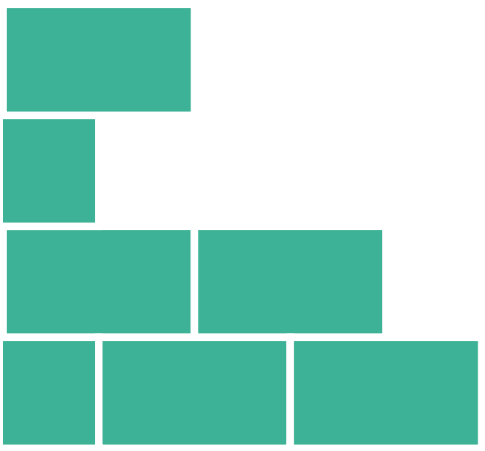

Look at the materials on the benches.  
Don't touch them yet!

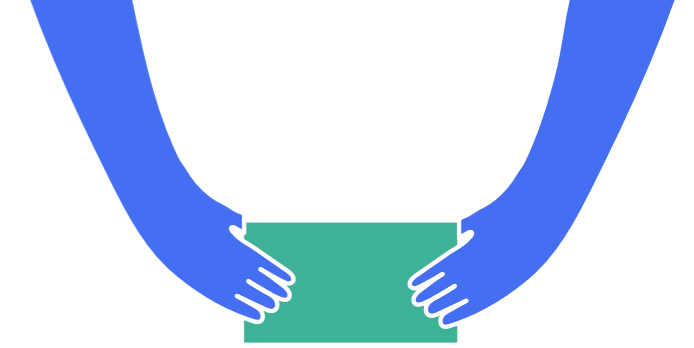

3.

Your task will be to **build a bridge** over which **to roll the ball from the first to the last bench.**

# RULES FOR BUILDING BRIDGES

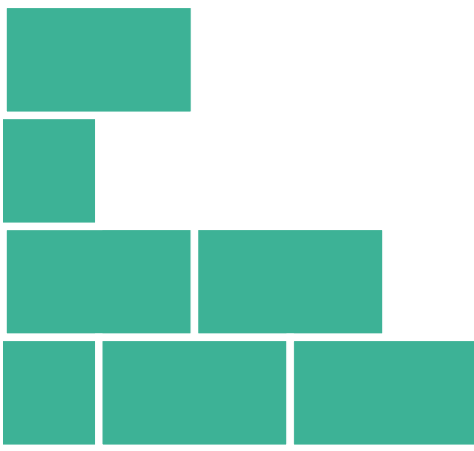

Each group builds a section of bridge between two benches.

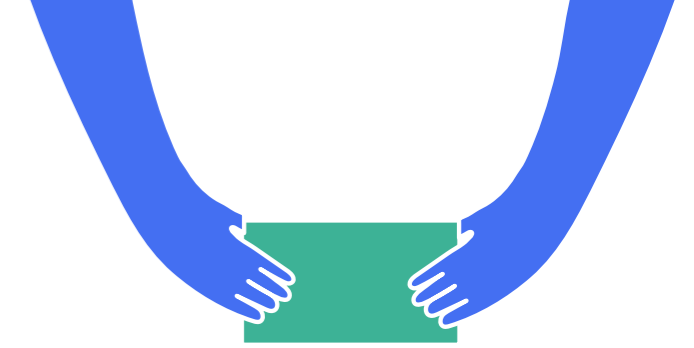

---

You may only use materials that are on the benches

---

The bridge fragments should hold by themselves,  
without help from the players' hands.  
They must not be glued to the benches.

without help from the players' hands.  
**They must not be glued to the benches.**

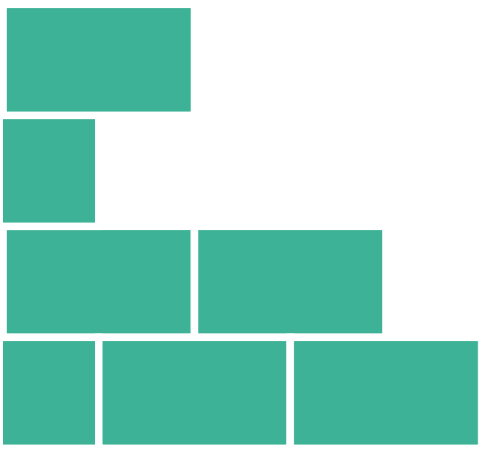

# TIPS

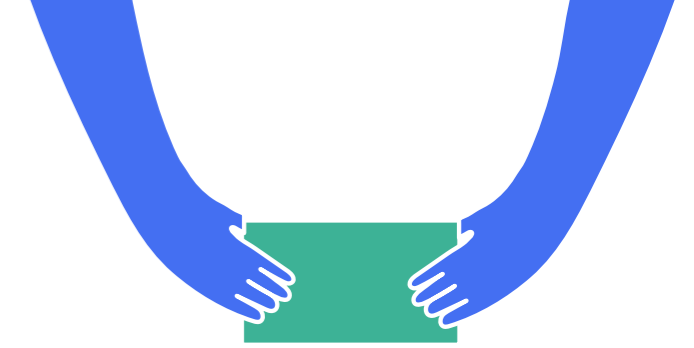

You can **help each other between groups** and share good ideas.

---

There is **no one right way to build.**

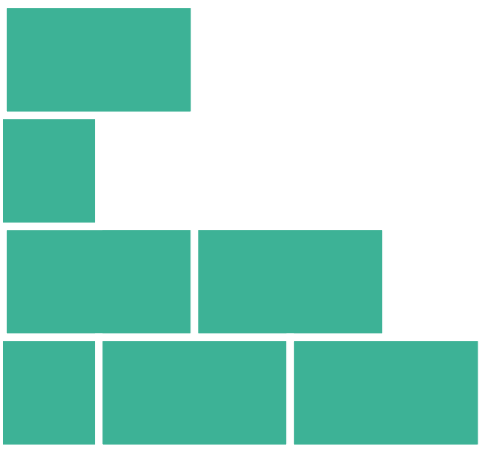

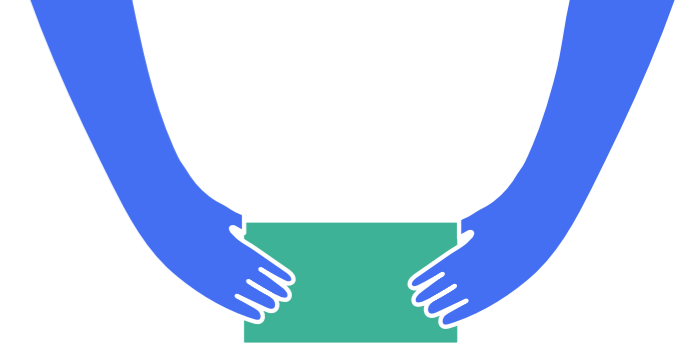

# END

When the bridge is ready, **see if you can roll a ball over it.**

To roll a ball over the bridge, **you can snap it, push it with a stick or rely on gravity.**

**YOU HAVE 20 MINUTES,**

**GOOD LUCK!**
